PROFESSIONAL SUMMARY

Full-stack Software Development Engineer with experience building and maintaining production systems at Zypp Electric. Skilled in Java, Spring Boot, Spring Security, REST APIs, React.js, PostgreSQL, Redis, Kafka, and Docker, with hands-on experience across ERP workflows, fleet operations, marketplace/order systems, authentication, payments, frontend architecture, performance optimization, and production support.

EDUCATION

SRM University, Sonipat, Haryana Aug 2022 – May 2026

Bachelor of Technology (B.Tech), Computer Science & Engineering | CGPA: 8.04/10

Christu Jyoti Convent Sr. Sec. School, Baghpat, Uttar Pradesh 2020 – 2021

Senior Secondary (ICSE) | 90.0%

CORE SKILLS

Languages: Java • JavaScript • SQL

Backend: Spring Boot • Spring Security • REST APIs • RBAC • Microservices • Node.js

Frontend: React.js • Vite • Tailwind CSS • PWA

Databases & Caching: PostgreSQL • MongoDB • Redis

Messaging & Infrastructure: Kafka • Docker • Jenkins

Tools: Git • Maven • Postman • Swagger/OpenAPI • IntelliJ • VS Code

Core: Data Structures & Algorithms • System Design • Design Patterns • Performance Optimization

PROFESSIONAL EXPERIENCE

Zypp Electric — Software Development Engineer I

Gurugram | Sep 2026 – Present

- Developed Spring Boot REST APIs and RBAC-based workflows for administrative operations, approvals, and operational reporting.
- Contributed to backend modules across Zypp's internal ERP and operational systems, including workflow automation, API integrations, and production issue resolution.
- Worked on backend changes and integrations across staging and production environments, supporting reliable releases and system stability.

Zypp Electric — Software Engineer Intern

Gurugram | Aug 2025 – Aug 2026

- Developed and maintained production React.js applications across **8+ business-critical platforms**, including ERP Inventory, KYC, Finance, Visitor Management, SaaS, and customer-facing systems.
- Led website performance optimization through **code splitting, lazy loading, WebP adoption, deferred asset loading, build optimization, and PWA improvements**, increasing Lighthouse Performance from **~30 to 93**, reducing FCP from **1.8s to 0.6s** and Speed Index from **8.5s to 1.4s**.
- Contributed to frontend architecture and application scalability through **reusable component systems, shared modules, state management patterns, and monorepo-based development**, improving consistency and maintainability across applications.
- Contributed to Zypp's internal ERP and operational workflows, automating manual processes through backend APIs and new application modules.
- Contributed to **marketplace and vendor workflows** covering product discovery, cart/order management, payment integrations, order tracking, reports, and exchange-order flows.
- Integrated React applications with Spring Boot REST APIs and worked across authentication/RBAC, data flows, production troubleshooting, code reviews, and multi-environment releases.

PROJECTS

Tiffin Management Platform | Spring Boot, PostgreSQL, Redis, Kafka, Docker

- Developed a subscription-based food delivery platform supporting Customers, Vendors, and Admins.
- Implemented JWT-based authentication and role-based authorization using Spring Security.
- Designed automated daily order generation for active subscriptions using scheduled jobs.
- Applied Redis caching and performance optimization techniques to improve scalability and response times.
- Designed event-driven communication using Kafka for order processing and notifications.
- Containerized services using Docker and documented APIs using Swagger/OpenAPI.
